LinkedIn: linkedin.com/in/muralidharan-k-041aa52b9 **GitHub:** github.com/Murali304-cmd

Objective:

Motivated Information Technology undergraduate with a strong passion for Data Analytics, Machine Learning, and Software Development. Proficient in Java, Python, SQL, Power BI, and data visualization, with practical experience gained through academic projects and a Data Analytics internship. Dedicated to building innovative, data-driven solutions while continually strengthening technical and analytical expertise.

Area of Interest:

1. Data Analytics.
2. Machine Learning.
3. Software Development.

Education:

Bachelor of Engineering in Information Technology | Dr. Mahalingam College of Engineering and Technology, Pollachi.
06/2028 | 8.3 CGPA
HSC | Variyar Higher Secondary School, Dharmapuri.
SSLC | Variyar Higher Secondary School, Dharmapuri.

Skills:

Technical Skills:

- **Programming Languages:** Java, Python.
- **Tools:** Excel, Power BI, Tableau.
- **Database Management:** SQL, MongoDB.
- **Frameworks:** React, Node.js.

Soft Skills:

- **Analytical Thinking** – interprets complex data to support well-informed decisions.
- **Problem Solving** – devises practical, effective solutions.
- **Quick Learner** – readily adapts to emerging technologies and concepts.

Projects:

1. Customer Segmentation Analysis
Leveraged DAX to build calculated measures and interactive visualizations, generating actionable insights that inform effective business decision-making.

2. AI Cash Demand Prediction
Conducted data preprocessing and analysis using Pandas and NumPy to produce accurate demand forecasts, supporting efficient cash management and well-informed operational decisions.

3. AI Model Dataset Management System
Designed and implemented features for storing, retrieving, updating, and organizing dataset records through database connectivity, delivering a structured, user-friendly dataset management solution.

Internships:

Thiranx – Data Analytics Intern [Remote] [06.06.2026] to [05.07.2026]

- Collected, cleansed, and analyzed datasets using Python (Pandas, NumPy) and Excel.
- Developed interactive dashboards and visualizations with Power BI and Matplotlib.
- Presented analytical findings and strategic recommendations to inform business decisions.

Certifications:

- Certified as an Oracle Fusion AI Agent Studio Foundations Associate.
- Completed a Data Scientist course through Tamil Nadu Building and Other Construction Workers.
- Participated in CodeChaos – Sophomore Edition at Technofete'26, developing an Enhanced Hybrid Recommendation System that uses BERT for sentiment-based, personalized recommendations.

Achievements:

- Achieved a Global Rank of 16,434 in the international coding competition organized by TCS.

Extracurricular Activities:

- Active member of the National Service Scheme (NSS) at college.
- Attended technical workshops, webinars, and seminars on Data Analytics and Artificial Intelligence.
- Pursue continuous, self-directed learning through online coding platforms and technical communities.
